# King's Gambit Accepted

ECO C33-C39 | 137 named lines | Open games (1.e4 e5)

**In one sentence:** Classical open-game theory: rapid development, central tension and king safety decide the game.

**Memory pattern:** Knights, bishops, castle, then open the center when ahead in development.

Main line: 1.e4 e5 2.f4 exf4 3.Nf3 g5 4.Bc4 g4 5.O-O gxf3 6.Qxf3 Qf6 7.e5 Qxe5

### Key ideas

**1.** Develop knights before bishops and castle early.
**2.** Fight for the center with d4 or ...d5 at the right moment.
**3.** Use gambit ideas (Scotch, King's Gambit, Vienna) only when you know the follow-up tactics.
**4.** Avoid pawn grabs that cost tempi; watch f7/f2 weaknesses.
**5.** Trade pieces when ahead; keep tension when your pieces are more active.

### Reading the diagram

Blue arrows = thematic plan moves for the side to move. Green arrow = engine's best move.
Engine at the end of the main line: **-1.52** (clearly better for Black, depth 17). Best: d3.

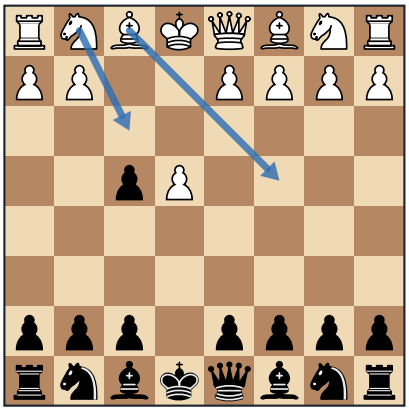

## The five coach questions

| | |
|---|---|
| **1. Ideal pawn structure?** | Open centre: lines open early, so development and king safety dominate. Structures range from open centres to gambit positions. |
| **2. Where does my king go?** | Castle early; do not leave the king in the center when lines open. |
| **3. Best minor pieces?** | Develop knights then bishops; fight for the center and the f7/f2 squares. |
| **4. Main middlegame plan?** | Complete development, castle, then open the center or attack the weak point. |
| **5. What does my opponent want?** | The side with the initiative wants to open lines; the defender wants to neutralize with ...d5 or ...Nf6. |

# Expert and coach view

### What a coach would tell you

Count your developed pieces versus your opponent's every move. If you are ahead, open the position; if behind, keep it closed or trade.

### Why play it

Classical open-game theory: rapid development, central tension and king safety decide the game.

### Typical mistakes

- Early queen sorties that lose time.
- Leaving the king in the center when lines are open.
- Grabbing a pawn and falling behind in development.

### Typical tactics and traps

- Fried Liver, Legal's Mate and similar f7/f2 tactics.
- Scholar's-style Qh5/Bc4 attacks on f7 if Black ignores them.

### Endgame and middlegame outlook

Open games reward activity; simplified endings depend on pawn structure and piece activity.

### Study checklist

[ ] Play the main line on a board and say each move's purpose aloud.

[ ] Learn the five coach questions by heart; answer them without notes.

[ ] Drill two sub-variations until the moves feel automatic.

[ ] Play three games with the opening, then review where you left theory.

[ ] Re-read the traps page the day before a tournament.

# One-page memory sheet

### Move-order pattern

```
1.e4 e5 2.f4 exf4 3.Nf3 g5 4.Bc4 g4 5.O-O gxf3
```

### Plan chain

| | |
|---|---|
| **White** | Nf3 -> Nc3 -> d4 -> Bc4 -> Bd3 |
| **Black** | Nc6 -> Nf6 -> d5 -> Be7 -> Bc5 |

### Three rules to remember

1. Knights, bishops, castle, then open the center when ahead in development.
2. Complete development, castle, then open the center or attack the weak point.
3. The side with the initiative wants to open lines; the defender wants to neutralize with ...d5 or ...Nf6.

### Pawn structure in one line

Open centre: lines open early, so development and king safety dominate. Structures range from open centres to gambit positions.
